Santiago Carrizo

Full Stack & Mobile Developer | Salta, Argentina
santiago.carrizo.dev@gmail.com | linkedin.com/in/santiago-carrizo-dev | github.com/santiago-carrizo7

Professional Summary

Advanced Programming student at the National University of Salta, focused on Full Stack development. Practical experience building web applications, REST APIs, and mobile solutions with TypeScript, React, Node.js, Express, PostgreSQL, and Flutter. Currently developing academic and independent projects focused on software architecture, databases, authentication, multi-tenant systems, and offline-first applications.

Featured Projects

Gestión Deportiva – B2B Multi-Tenant SaaS & Mobile App | *Thesis* Salta, Argentina

– **Technologies:** TypeScript, Node.js, Express 5, React 19, Flutter, PostgreSQL, Prisma ORM, SQLite, Zod, Redis.

- Designed a 3-layer platform (REST API, Web SPA, and Mobile App) for comprehensive management of sports clubs and institutions.
- Implemented multi-tenant isolation using Prisma extensions and `AsyncLocalStorage`, ensuring data separation between organizations.
- Developed an offline-first mobile architecture with SQLite and a transactional event queue for attendance tracking and roster access in the field.
- Implemented JWT authentication with Refresh Token Rotation, token reuse detection, and multi-tenant payment integration with Mercado Pago and idempotent webhooks.

Alma Lectora – E-Commerce & Catalog and Inventory Management | *Independent Project* Salta, Argentina

- **Technologies:** TypeScript, React 19, Node.js, Express 5, PostgreSQL, Prisma ORM, Tailwind CSS, Zod, Sharp.
- Developed a decoupled e-commerce platform (SPA + REST API) for managing a bookstore's catalog, inventory, and orders.
- Implemented fuzzy search in PostgreSQL using `pg_trgm`, GIN indexes, and advanced SQL queries to improve book search.
- Built a catalog creation and enrichment workflow using EAN-13/ISBN barcode scanning and cascading external API queries.
- Designed transactional operations for stock deduction in bundles and an image processing pipeline using Sharp and WebP format.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Dart, SQL
Frontend Web: React 19, Tailwind CSS, TanStack Query, Zustand, Vite, React Hook Form, HTML5, CSS3
Backend & APIs: Node.js, Express 5, REST APIs, Zod, JWT, HTTPOnly Cookies, Refresh Token Rotation, Bcrypt, OpenAPI/Swagger
Databases: PostgreSQL, Prisma ORM, SQLite, Advanced SQL, GIN/Composite Indexes, ACID Transactions
Mobile Development: Flutter, Provider, Dio, SQLite, Offline-first architecture
Tools & Services: Git, GitHub, Docker, Vercel, Redis, Mercado Pago API, Firebase FCM

Education

National University of Salta (UNSa) Salta, Argentina
University Technician Degree in Programming – Final Year *2023 – Present*

- Training in algorithms, data structures, programming, web development, and relational databases.

Certifications

Aprende SQL – Midudev August 2026
Advanced queries, JOINs, CTEs, window functions, transactions, and indexes.

Languages & Continuing Education

Languages: Basic English – technical reading
Continuing Education: React, TypeScript, Node.js, and Full Stack development through self-directed learning and practical projects
