Santiago Carrizo

Full Stack & Mobile Developer | Salta, Argentina
santiago.carrizo.dev@gmail.com | santiagocarrizo.vercel.app | linkedin.com/in/santiago-carrizo-dev | github.com/santiago-carrizo7

Professional Summary

Final-year Programming student at the National University of Salta (UNSa), focused on Full Stack development. Hands-on experience building web applications, REST APIs and mobile solutions with TypeScript, React, Node.js, Express, PostgreSQL and Flutter. Currently working on academic and independent projects centered on software architecture, databases, authentication, multi-tenant systems and offline-first applications. Looking for my first professional opportunity as a Junior Full Stack Developer.

Featured Projects

GADI – Multi-Tenant B2B SaaS & Mobile App | *Thesis* Case study

- **Technologies:** TypeScript, Node.js, Express 5, React 19, Flutter, PostgreSQL, Prisma ORM, SQLite, Zod, Redis.
- Designed a 3-tier platform (REST API, Web SPA and Mobile App) for sports club management.
- Implemented multi-tenant isolation with Prisma extensions and `AsyncLocalStorage`, separating data by organization.
- Built an offline-first mobile app with SQLite and a transactional event queue for taking attendance in the field.
- Implemented JWT authentication with Refresh Token Rotation and reuse detection, plus multi-tenant payments with Mercado Pago (idempotent webhooks).

Alma Lectora – Catalog & Inventory Management | *Independent Project* Case study | Live site

- **Technologies:** TypeScript, React 19, Node.js, Express 5, PostgreSQL, Prisma ORM, Tailwind CSS, Zod, Sharp.
- Built a decoupled e-commerce platform (SPA + REST API) to manage a bookstore's catalog, inventory and orders.
- Implemented book search in PostgreSQL with GIN indexes to improve catalog retrieval.
- Built a catalog onboarding flow with EAN-13/ISBN barcode scanning and cascading lookups across external APIs.
- Designed transactional stock deduction for bundles and an image pipeline using Sharp and WebP.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Dart, SQL, PHP
Web Frontend: React 19, Tailwind CSS, TanStack Query, Zustand, Vite, React Hook Form, HTML5, CSS3
Backend & APIs: Node.js, Express 5, Laravel, REST APIs, Zod
Databases: PostgreSQL, Prisma ORM, SQLite, SQL, GIN/composite indexes, ACID transactions
Mobile Development: Flutter, Provider, Dio, SQLite, offline-first architecture
Security & Authentication: JWT, Refresh Token Rotation, HttpOnly cookies, bcrypt
Tools & Services: Git, GitHub, Docker, Vercel, Redis, Mercado Pago API, Firebase FCM

Education

National University of Salta (UNSa) Salta, Argentina
University Technical Degree in Programming – Final Year *2023 – 2026 (est.)*

- Coursework in algorithms, data structures, programming, web development and relational databases.

Certifications & Training

Learn SQL – Midudev August 2026
Advanced queries, JOINs, CTEs, window functions, transactions and indexes. Certificate of completion.

AI-Assisted Development Course – Brais Moure & BIG school October 2026
AI-assisted development, advanced prompting, use of agents and structured workflows with LLMs. Certificate of attendance.

Languages

Spanish: native | **Italian**: intermediate (bilingual Italian-Argentine school) | **English**: basic, technical reading
